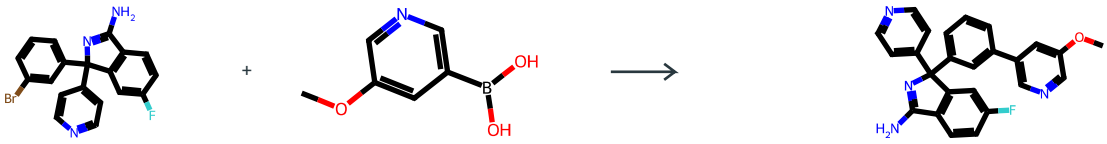
Performed source and generated analogue disconnections

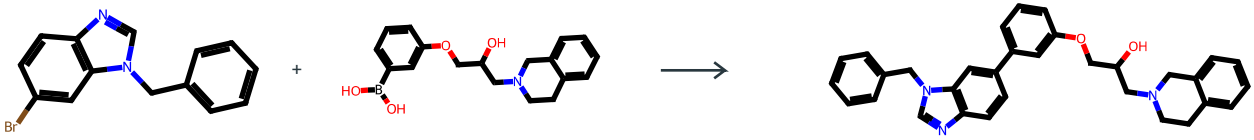
Only the source row is an experiment; generated query rows are Tier B compatibility inferences.

US7855213B2 | performed source | Example85



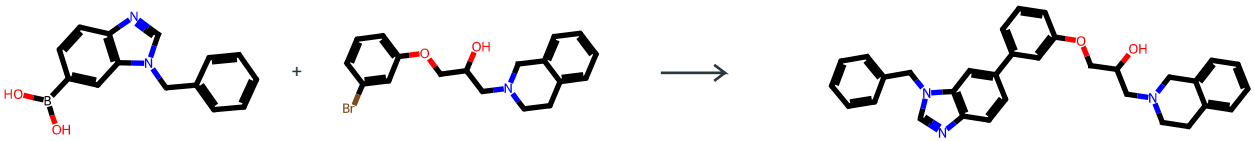
Pd(dppf)Cl2/Cs2CO3; DME/H2O/EtOH6:3:1; Ar,microwave130 C15min. Example85:16% reported yield.

Generated query 6bee7c01a6c8 | Tier B analogue, not a performed experiment



Specific substrate conversion,yield,selectivity and auxiliary-mixture match are unmeasured.

Generated query a624a32dbebb | Tier B analogue, not a performed experiment



Specific substrate conversion,yield,selectivity and auxiliary-mixture match are unmeasured.

Forward-oriented net schemes; no source validation of individual symbolic electron arrows or a complete route.
