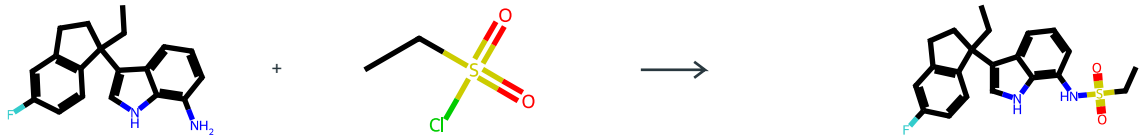
Performed experimental precedent for generated complete reactions

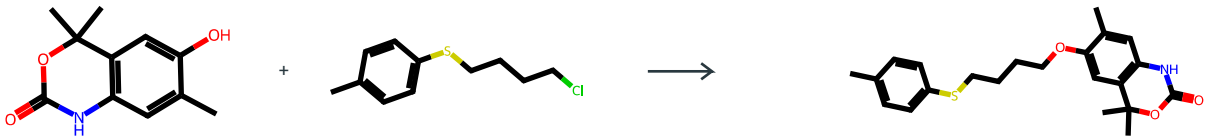
Selected cases; complete net chemistry, not experimentally established electron-arrow sequences.

1. Tier A · US7728150B2:example19:indol7yl-ethanesulfonamide



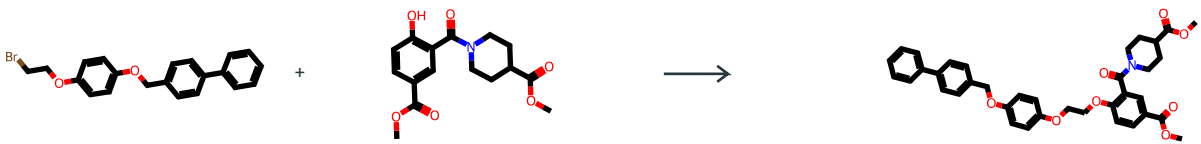
Pyridine, room temperature, nitrogen, overnight (Example15 method). Example19:35%,0.18g; LC-MS387.1(M+H). No enantiomer-purity claim.

2. Tier A · US4518597:example374:trimethyl-benzoxazinone-phenol-alkylation



K2CO3/DMSO,40 C,3h (Example4 method). Example374:51.9%; mp114-115 C. Four-carbon linker; carbamate NH retained.

3. Tier A · US7498460B2:example68:bisester-piperidine-phenol-alkylation



Cs2CO3/anhydrous DMF,about50-60 C,3h (Example22 method). Example68:LC-MS623; NMR/HPLC reported. Individual yield unstated; both methyl esters retained.

Source/training overlap unknown; an experimentally documented transformation is not a tested whole route.
