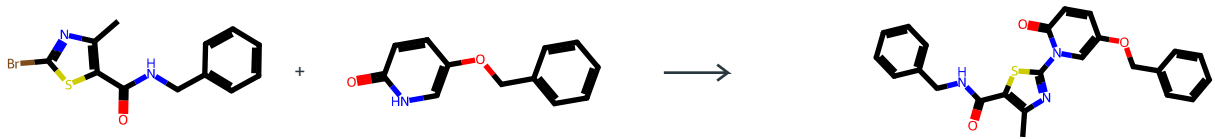
Performed experimental precedent for generated complete reactions

Selected cases; complete net chemistry, not experimentally established electron-arrow sequences.

1. Tier A · US8501746B2:example3.2:pyridone-N-arylation



Example 3.2 substitutes 5-(benzyloxy)pyridin-2(1H)-one into Example 3: CuI, 8-hydroxyquinoline, K2CO3, degassed DMSO, 75-80 C, 16 h; aqueous precipitation and chromatography. Individual Example 3.2 yield 32%, white solid, mp 166-167 C, 1H/13C NMR and MS m/z 432.2 (M+1). Example 3 reagent quantities are not assigned as Example 3.2 measurements.

2. Tier A · US8344135B2:exampleD25i:cyanopropyl-benzoyl-chloride

3-(1-Cyano-1-methylethyl)benzoic acid 9.87 g/52.2 mmol in toluene 150 mL, SOCl2 25.3 g/213 mmol, 120 C, 2 h; reduced-pressure concentration gives the named acid chloride as colorless oil, subsequently used in amidation.

Source/training overlap unknown; an experimentally documented transformation is not a tested whole route.
