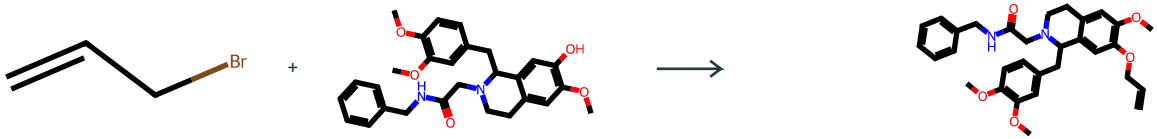
Performed experimental precedent for generated complete reactions

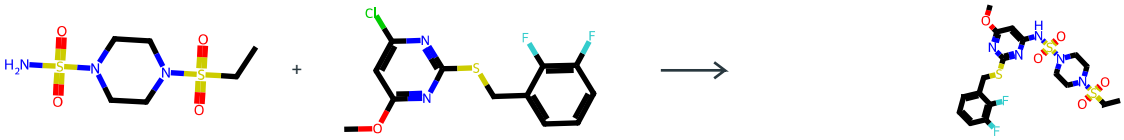
Selected cases; complete net chemistry, not experimentally established electron-arrow sequences.

1. Tier A · US6703392B2:example263:isoquinoline-7O-allylation



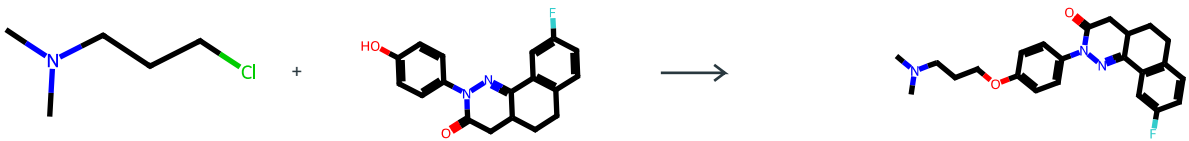
K2CO3/DMF,100 C90min twice, two allyl-bromide portions; then Et3N/THF,14h (C.2). Example263:LC-MS517(M+H); individual yield unstated.

2. Tier A · US8722883B2:example62:pyrimidinyl-piperazine-sulfamide-coupling



Pd2(dba)3/XPHOS/Cs2CO3,dioxane,microwave100 C,10min (Example1iv method). Example62:0.37g; APCI524(M+H). Net coupling, not proof of each electron arrow.

3. Tier A · US5045541:example9:fluoro-cinnolinone-phenol-alkylation



KOH/ethanol,reflux11h (synthetic Example1 method). Example9 names unsalted product,mp118-120 C; individual yield unstated. No salt/purity assignment beyond source name.

Source/training overlap unknown; an experimentally documented transformation is not a tested whole route.
