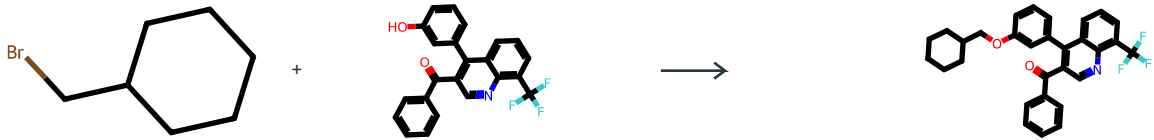
Performed experimental precedent for generated complete reactions

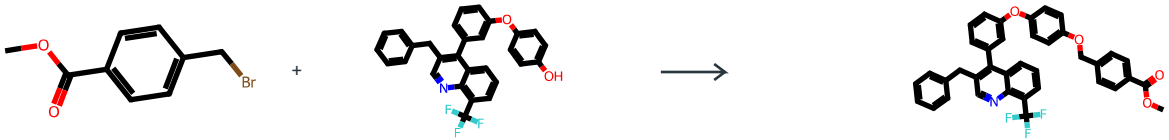
Selected cases; complete net chemistry, not experimentally established electron-arrow sequences.

1. Tier A · US7576215B2:example500:quinoline-phenol-cyclohexylmethylation



US7576215B2, Example500/478: hydroxyphenyl benzoylquinoline + bromomethylcyclohexane; cesium carbonate/DMF,60 C14 h, reverse-phase HPLC. MS490.3; no individual yield. Quinoline C3-benzoyl/C8-CF3 and one-methylene O-linker retained.

2. Tier A · US7576215B2:example525:bisaryl-quinoline-benzyl-ether



US7576215B2, Example525/478: bisaryl phenol0.1 g + methyl4-(bromomethyl)benzoate0.057 g; cesium carbonate/DMF,60 C14 h, reverse-phase HPLC. MS620.0; no individual yield. Methyl ester retained; subsequent Example526 hydrolysis excluded.

Source/training overlap unknown; an experimentally documented transformation is not a tested whole route.
