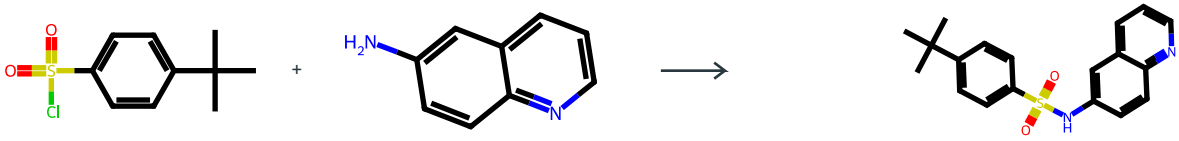
Performed experimental precedent for generated complete reactions

Selected cases; complete net chemistry, not experimentally established electron-arrow sequences.

1. Tier A · US7435815B2:sectionC1:quinolin6-sulfonamide



The listed quinolin-6-ylamine and para-tert-butylbenzenesulfonyl chloride follow C.1: 1:1 substrate equivalents, DIPEA 1.2 eq in THF, room temperature 16 h, aqueous workup and crystallization or preparative HPLC. Specific LC-MS Rt 0.82 min, m/z 341 (M+1). No individual yield assigned.

2. Tier A · US4829069:example2g:quinazoline-S-benzylation

4-Mercaptoquinazoline 3.0 g and 2-dimethylaminobenzyl chloride 6.1 g, by Example 1 methanolic sodium methoxide/room-temperature procedure. Isolated 1.31 g pale yellow crystals from isopropyl ether, mp 79.0-81.9 C, NMR/IR; no percentage yield inferred.

Source/training overlap unknown; an experimentally documented transformation is not a tested whole route.
