Structural retrieval coverage across the full generated reaction pool

n=18,210 distinct reactions; all runs retained; unequal work.

a Mapped net changed bonds

Stratum	Reactions	Indexed candidate	Checked A/B
0	365	0	0
1-3	9,991	60	33
4-6	3,944	61	5
7+	3,809	43	8
Unknown	101	1	1

b Product heavy atoms

Stratum	Reactions	Indexed candidate	Checked A/B
1-15	3,633	17	10
16-30	10,280	86	24
31-45	4,055	51	10
46+	242	11	3

c Forward net ring-count change

Stratum	Reactions	Indexed candidate	Checked A/B
decrease	902	36	2
unchanged	15,348	128	45
increase	1,960	1	0

An indexed candidate is not checked experimental precedent. Unresolved does not mean invalid.

Ring count is an RDKit graph descriptor, not a physical mechanism or ring-strain measurement.
